

Written Content & Copy Specification

Scope: All components under `src/components/` **Product:** Clinic & Dispensary Management System for Sri Lanka

Status: Active / Production

What is ClinkKare?

ClinkKare is clinic software for Sri Lanka that connects the doctor, the dispensary, and the stock list in one system. The prescription reaches the dispensary screen instantly, labels print automatically, and the doctor sees what is in stock before prescribing.

Target Audience: Private clinics and medical practices in Sri Lanka with an in-house dispensary · 3 months free for founding clinics.

Founder Origin: Built in Colombo by a founder who sat in these clinics as a patient.

CLINIC SOFTWARE FOR SRI LANKA

Onboarding 10 founding clinics in Colombo

"Prescribe once. Your dispensary sees it instantly."

ClinKare connects your doctor, dispensary and stock in one system. Labels print automatically, and you see what's in stock before you prescribe.

Primary CTA: Book a 10-minute demo

Secondary CTA: Watch the 60-second demo

Context Statement: Built for private clinics and medical practices with an in-house dispensary · 3 months free for founding clinics

SECTION 02

The Problem (ProblemSection.tsx)

Headline: Where a paper-run clinic quietly loses time and money

Subtitle: Three things repeat every evening session.

PROBLEM 01

Written twice, by two people

The doctor writes the prescription. The dispenser reads it, re-enters it, and hand-writes a label for every packet. Same information twice, with a queue watching.

Cost: Slower queues and more chances for a misread dose.

PROBLEM 02

Prescribing without seeing stock

The doctor can't see what's on the shelf. When a medicine is out, the patient gets sent to a pharmacy down the road.

Cost: Dispensary revenue the clinic earned and handed away.

PROBLEM 03

Phone numbers in a drawer

Every patient's number sits in a paper file and never gets used. Nobody follows up when a course of medicine ends.

Cost: Patients who feel better on day 7 and never come back.

ClinKare connects these. [See how it works →](#)

SECTION 03

Features & System Capabilities (FeaturesSection.tsx)

Headline: One system for the doctor's desk and the dispensary

Subtitle: Start with the core flow. The rest plugs in as your clinic is ready for it.

FEATURE / 01 (FLAGSHIP WORKFLOW)

Digital prescription to dispensary

Write it once. It appears on the dispenser's screen instantly, with clear auto-printed packet labels and zero handwriting to decode.

Sync Speed: < 0.2s instant **Paper Saved:** 100% digital **Accuracy:** 0 misread doses

FEATURE / 02

Live stock visibility & expiry alerts

See what's on the shelf before you prescribe, so patients aren't sent to a pharmacy down the road. Know what's expiring before it becomes waste.

Real-time shelf counts · 60-day auto warnings

CORE ENGINE

Central Clinic Engine

ClinKare connects the doctor's desk, dispensary shelves, and thermal printer into one continuous, synchronized workflow.

Zero transcription lag · Clinic-wide sync

FEATURE / 03

Patient records & WhatsApp reminders

Every visit on file so no consultation starts from zero. Send gentle automated reminders when a course is ending on the app patients already use.

Full patient history · Automated WhatsApp nudge

SECTION 04

How It Works (HowItWorks.tsx)

Headline: From prescription to packet in three steps

Subtitle: The same evening session, with the handwriting taken out.

1

The doctor prescribes on a tablet

Pick medicines from your own stock list, with live stock shown beside each one. You see what's on the shelf before you prescribe.

Live shelf stock verified in real time

2

The dispensary sees it instantly

The prescription appears on the dispenser's screen the moment you confirm it. Nothing to read, nothing to re-enter.

Instant screen transmission · 0 errors

3

Labels print automatically

Each packet gets a printed label with the medicine, dose and instructions. The dispenser checks, packs and hands over.

Thermal printed packet label with dose & instructions

Onboarding Guarantee: We help you set up your stock list, so you start with a working system.

SECTION 05

Pricing & Plans (PricingSection.tsx)

Headline: Simple pricing for Sri Lankan clinics

Description: ClinKare costs LKR 3,500 to LKR 7,000 per month depending on your clinic setup: 3,500 for a clinic where the doctor prescribes, and 7,000 for a clinic with an in-house dispensary. Founding clinics get their first 3 months free.

CONSULT TIER

Consult

For clinics where the doctor prescribes and patients collect medicine elsewhere.

LKR 3,500 /month

- ✓ Digital prescriptions on a tablet
- ✓ Patient records
- ✓ WhatsApp medicine reminders
- ✓ Setup and training included

Action: [Book a 10-minute demo](#)

CLINIC TIER (RECOMMENDED)

Clinic

For clinics with an in-house dispensary. This is the full prescription-to-dispensary flow.

LKR 7,000 /month

- ✓ **Everything in Consult**
- ✓ Prescription appears on dispensary screen instantly
- ✓ Auto-printed dispensary labels
- ✓ Live stock visibility
- ✓ Medicine expiry alerts
- ✓ We set up your stock list for you

Price locked for as long as you stay subscribed. Full setup, stock list import, and staff training included.

Required Hardware: Tablet & thermal label printer (compatible devices list provided).

Custom Needs: "Need something bigger? Talk to us on WhatsApp →"

SECTION 06

Frequently Asked Questions (FaqSection.tsx)

Headline: Questions doctors ask before they book a demo

Subtitle: Clear, honest answers about pricing, clinic hardware, stock setup, and day-to-day dispensary workflow.

1. How much does ClinKare cost?

ClinKare costs LKR 3,500 per month for a clinic where the doctor prescribes, and LKR 7,000 per month for a clinic with an in-house dispensary. Founding clinics get their first 3 months free. Setup and training are included.

2. What does the founding clinic offer include?

The first 10 clinics in Colombo get 3 months free. After that, you continue at your locked price for as long as you stay. Founding clinics also tell us what to build next.

3. Who is ClinKare built for?

ClinKare is built for private clinics and medical practices in Sri Lanka, especially practices with an in-house dispensary where the doctor prescribes and the dispenser hands out the medicine. It fits single-doctor and growing multi-doctor practices.

4. What do I need to buy to get started?

You need a tablet for the doctor's desk, a label printer at the dispensary, and an internet connection. Before you buy anything, we share the list of printers that work with ClinKare so nothing is wasted.

5. How long does setup take, and who does it?

We do it with you. We enter your stock list, connect your printer and train your dispenser, so you start with a working system, not an empty one. Most clinics are ready in 48 hours from the demo.

6. Will my dispenser be able to use it?

Yes. The dispenser's screen shows the prescription the moment you confirm it, so there's nothing to read and nothing to re-type. We train your dispenser during setup and stay on WhatsApp for the first weeks.

7. Does ClinKare work without internet?

ClinKare needs an internet connection. A standard mobile hotspot or 4G clinic router is enough. If your connection temporarily drops, prescriptions are safely queued and resume the moment signal reconnects.

SECTION 07

Demo Conversion & Booking (FinalCta.tsx)

Headline: See it in your clinic in 10 minutes

Subtitle: Book a short demo and watch a prescription reach the dispensary screen, then the label print. No commitment. The first 10 founding clinics in Colombo get 3 months free.

"Ready to test the prescription-to-dispensary flow?"

We walk you through the tablet, print a live thermal label, and answer any questions about your current setup.

WHAT TO EXPECT IN THE 10-MINUTE DEMO:

- 1. Prescribe on the tablet:** See live stock beside each medicine as you write.
- 2. Instant dispensary sync:** Appears on the screen in < 0.2s with zero handwriting.
- 3. Auto-print thermal label:** Clear patient name, medicine, dose & instructions.

Trust Assurance: Built for private clinics and medical practices with an in-house dispensary. We can demo at your clinic. Zero installation required · Works in any browser.
