Suwenzo Healthcare Platform

Cloud-Native SaaS Intelligence for Integrated Clinic, Pharmacy & Lab Networks

1. EXECUTIVE OVERVIEW

Suwenzo is a modern, cloud-native Software-as-a-Service (SaaS) platform engineered to connect consultation rooms, pharmacy counters, and a fully-fledged laboratory system in real time. Designed to be accessed and operated from anywhere on any device or web browser, Suwenzo eliminates operational bottlenecks and provides complete visibility across multi-branch healthcare ecosystems.

By seamlessly orchestrating patient flow, prescription fulfillment, and lab requisitions, Suwenzo enables healthcare enterprises to deliver faster, safer, and higher-quality care at scale.

2. CORE SYSTEM MODULES & FEATURES

Smart Clinic & Consultation Engine

- **Multi-Input Prescription Workflows:** Supports quick-tap buttons for common medications and instant search, ensuring frictionless prescribing for doctors.
- **Live Inventory Visibility:** Real-time stock matching alerts doctors to medicine availability during consultations.
- **Dedicated Printing Features:** Explicitly supports patient ID card issuing, queue number printing, and prescription printing directly from the system.
- **Unified Electronic Medical Records (EMR):** Instant access to complete patient medical histories and clinical notes.

High-Speed Pharmacy & Inventory

- **Smart Drug Swapping:** Ability to swap drugs seamlessly based on active real-time inventory availability.
- **Dosage & Stock Balancing:** In-built features that allow for precise dosage changes, alongside separate, dedicated methods for drug balancing across shelves.
- **Automated Configurable Expiry Alerts:** System alerts for upcoming drug expiries that are fully configurable, such as sending notifications at 3 months instead of 30 days.
- **Drug Consumption Tracking:** Tracks and displays drug consumption so users can estimate their remaining drug balances by the end of the month.

Connected Laboratory System

- **Fully-Fledged Laboratory System:** A complete diagnostic module tightly integrated into the primary clinical workflow.
- **Analyzer Device Interfacing:** Capability to integrate directly with analyzers (machines that analyze tests) to generate direct reports.
- **Direct Order Requisition Sync:** Laboratory test orders created by doctors sync directly to the lab queue without manual hand-offs.

Patient Engagement

- **Automated Notifications:** Keep patients engaged with automated appointment reminders and treatment follow-ups (configurable for email, WhatsApp, and SMS).

3. MODULAR SYSTEM ARCHITECTURE & DEPLOYMENT

SUWENZO SOFTWARE ECOSYSTEM

Clinic Module | Pharmacy Module | Lab Module

** Individual modules can be seamlessly enabled or disabled based on clinic requirements.*

ENTERPRISE CLOUD INFRASTRUCTURE (MICROSOFT AZURE)

Cloud-Native (Azure) · React · Node.js · PostgreSQL

Built to Health Standards · HIPAA Compliant · FHIR Compatible

Zero Initial Cost

No software setup fees or heavy upfront licensing costs.

First 3 Months Free

Risk-free onboarding & full data migration completely on us.

Pay Per User

Scalable OPEX commercial structure that grows with your clinic.

FOUNDING CLINIC PROGRAM

Be One of Our First 10 Founding Partner Clinics

Receive dedicated white-glove onboarding, custom inventory migration, and locked-in preferential lifetime enterprise SLA support.

10 SLOTS
Limited Cohort
